

MATH 161: Practice Final

Name: _____

Directions: No technology, internet, or notes. **Simplify all expressions + fully show all work for full credit.** If you have a question, ask me. Good luck!

1. Find the following limits:

$$(a) \lim_{h \rightarrow 0} \frac{\sqrt{1+h} - 1}{h}$$

$$(b) \lim_{x \rightarrow 0} \frac{1}{x} - \frac{1}{x^2 - x}$$

$$(c) \lim_{x \rightarrow 1} 2x^{100} + 4x^{55} - 8x^3 + 10x^{-2}$$

$$(d) \lim_{x \rightarrow 1} \frac{x^2}{1 - \cos x}$$

2. Find all of the local maximums and minimums of

$$f(x) = x + \frac{16}{x}$$

3. Suppose someone owns 4000 meters of fencing. They wish to create a rectangular piece of grazing land where one side is along a river. This means no fence is needed for the side along the river. Moreover, they wish to subdivide the rectangle into three sections with two pieces of fence, both of which are parallel to the sides not along the river.

(a) What are the dimensions of the largest area that can be enclosed?

4. Find the absolute minimum and maximum value, if any, of

$$f(x) = \frac{1}{8}x^2 - 4\sqrt{x} \quad [0, 9]$$

5. Using implicit differentiation, find dy/dx of

$$x^2 \cos^3(y) = 5 + 2xy^2$$

6. The number of housing starts is related to the mortgage rate by the equation

$$11N^3 + r = 16$$

where $N(t)$ is the number of housing starts (in units of a million) and $r(t)$ is the mortgage rate (in percent per year). What is the rate of change of the mortgage rate with respect to time when the number of housing starts is 1 million and is decreasing by $1/33$ of a million per year?

7. Find the derivative of the following:

(a) $f(x) = \left(x^2 + \frac{1}{e^{-x}}\right)^{3/2}$

(b) $f(x) = (\ln(x))^3$

(c) $f(x) = x^{\sin x}$

8. Sketch a graph of a function satisfying:

(a) $f'(x) > 0$ on $(-\infty, 1)$, $f'(x) < 0$ on $(1, \infty)$

(b) $f''(x) > 0$ on $(-\infty, -3) \cup (3, \infty)$, $f''(x) < 0$ on $(-3, 3)$

(c) $\lim_{x \rightarrow -3} f(x)$ does not exist

(d) $f(-3) = 4$

(e) $x = 0$ is a critical number

9. **Use the limit definition of the derivative** to find the derivative of $f(x) = \sqrt{x}$.

10. Find the intervals of concavity of

$$f(x) = \frac{x+1}{x-1}$$
